International Symposium on Advancements in Tourism, Recreation and Sports Sciences

International Symposium on Business and Economics

International Symposium on Advancements in Information Sciences and Technologies

SPONSORSHIP PROSPECTUS

Dear Contributors,

Today, it is more important than ever to follow and discuss the studies of academics both from your own field and from other disciplines close to your field and to generate ideas on common points. With this motive, we are pleased to invite you to “International Symposium on Advancements in Tourism, Recreation and Sports Sciences”, “International Symposium on Business and Economics”, and “International Symposium on Advancements in Information Sciences and Technologies”, having two special sessions titled “Distance Education and Educational Technology” and “Information Technology in Landscape Architecture”, that are to involve concurrent parallel sessions and to be held on 5-8 September 2018 by Global Science Institute (GSI) in collaboration with Mediterranean University.

During these symposiums organized by GSI, academics, experts, and implementers who are all well-recognized in their fields will present and discuss the latest developments in tourism, recreation, sports, business, and information technology in an academic setting. We anticipate around two hundred participants from different countries across the world in these symposiums, which are the first step to a long-term journey.

Your support for our symposiums as a sponsor will reinforce the bridge between academy and business world and contribute to the expansion of the communication network among academics from prominent universities of various countries in the world, experts mentoring international organizations, and professional executives.

We offer you being a part of this process of development and growth in the symposiums to be held at Centerville Hotel in Podgorica, the capital of Montenegro, providing new investment opportunities in many areas such as tourism, technology, industry, and education and standing as one of the popular countries in Europe as it has come so close to membership to the European Union. We would like to thank you in advance for your interest in our symposiums.

Best regards,

GSI 2018 Organizing Committee
